Hackers Den: how it is put together

the names doing the work

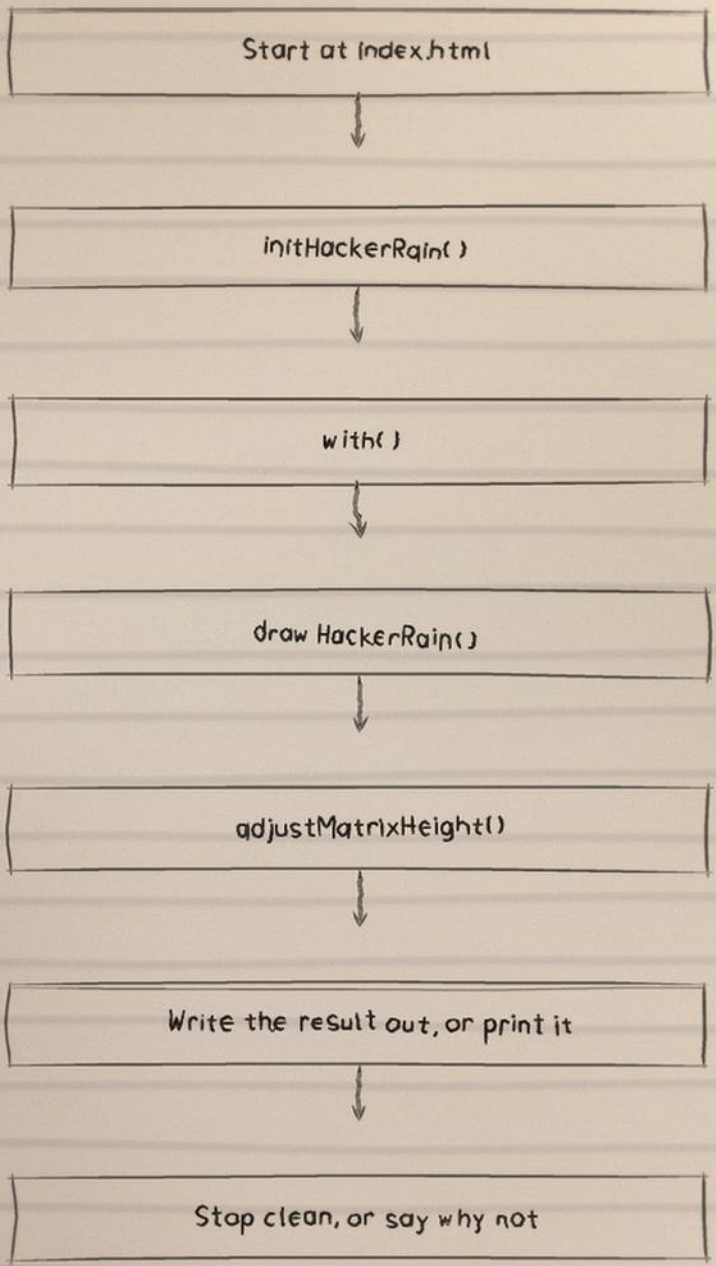

initHackerRain, withdrawHackerRain

adjustMatrixHeight, checkAndAdjustMatrixHeight, addFictionalSurveillanceElements

A Matrix-themed cybersecurity RSS newspaper, regenerated daily with GitHub Actions and published with GitHub Pages

sketched from the files

Hackers Den: the run, step by step

If a step fails, the honest run says so and stops.

traced, not guessed, GK

Product map: what Hackers Den is for

WHAT IT IS

A Matrix-themed cybersecurity RSS newspaper, regenerated daily with GitHub Actions and published with GitHub Pages.

WHAT GOES IN

The files at the top of the tree: index.html, custom-matrix.css, custom-matrix.css.

WHAT COMES OUT

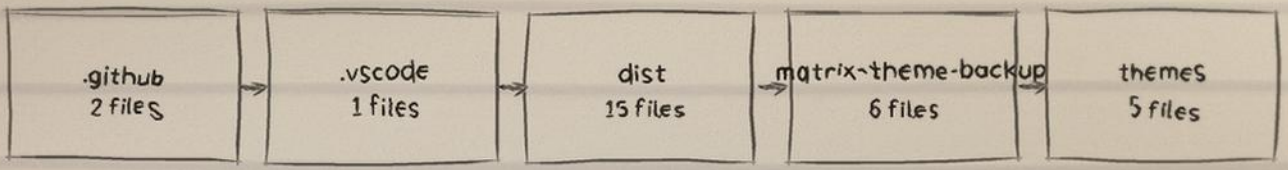

What the top files produce when they run or get read. Nothing else is promised.

WHERE IT STOPS

No service behind it, no account, no upload. If a path is untested, VISUAL.md says so.

mapped by hand, GK

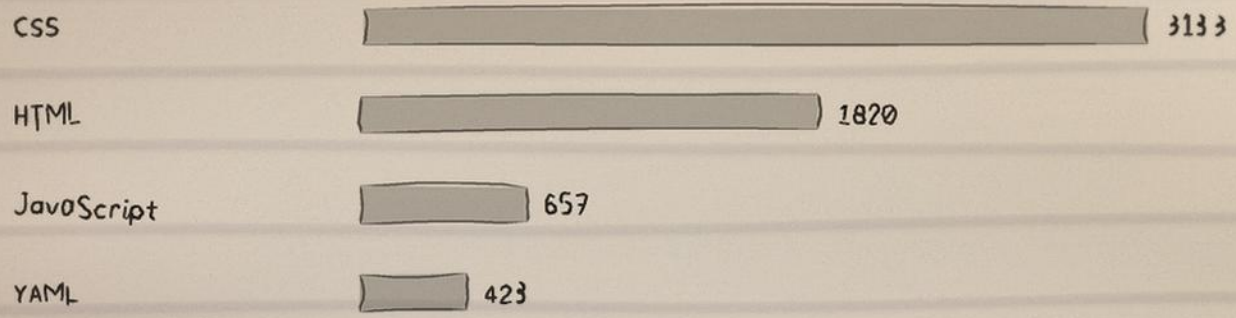

Hackers Den: the parts and their jobs

Each part is a folder or a file that is really in the tree.
If a part is only a name in the README, it is not drawn here.

Hacker's Den in numbers, counted 2026-10-30

Counted from the local snapshot of this repo. Method for every number: VISUAL.md.

99 files in the tree.

3 commits, first 2026-10-30, last 2026-10-30, from the local git log.

No test files by name in this snapshot.

counted and drawn, GK

Hackers Den: schematic of the apparatus

the system as a machine: parts, flow, and measurements

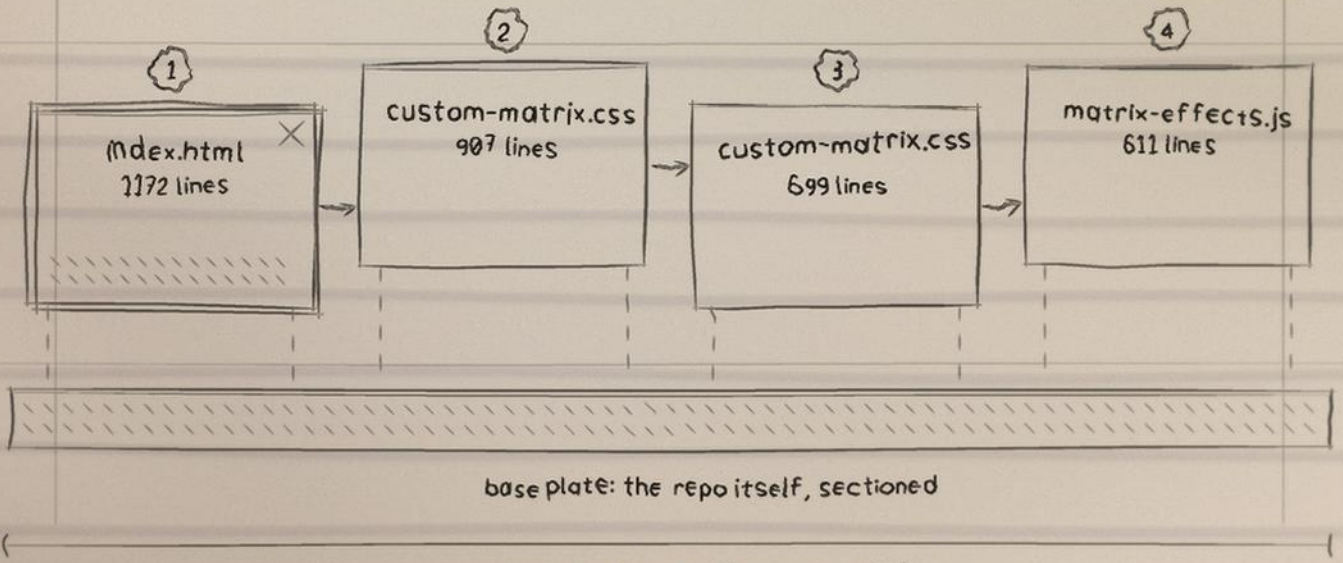

construction lines left in, as drawn

parts list

1. index.html
2. custom-matrix.css
3. custom-matrix.css
4. matrix-effects.js

in flow order, first to last

housed in: .github, .vscode, dist

base plate: the repo itself, sectioned

span: 39 files, 6479 lines counted

measured in the code: threshold 0.2 (matrix-effects.js)

turns of the crank so far: 3 commits, 2026-10-30 to 2026-10-30

measured and sketched, GK
